 [Developer Profile](#)

Computer Science WIL candidate with practical experience in React application development, backend-connected web platforms, IT support and system administration. Recently developed, deployed and maintained a business website using React, TypeScript, Vite, CMS/API integration and database-backed content workflows. Strong fit for junior software engineering roles requiring first-line support, documentation, testing, system monitoring, user support and digital transformation participation.

WORK EXPERIENCE

Technical Support Contractor / React Web Developer Virtual / Remote support

June 2026 - Present

- Provide remote technical support, user assistance and website maintenance for business users.
- Maintain production website content, deployment updates, uptime checks and platform improvements.
- Troubleshoot user, account, email, system and web platform issues; document fixes and escalate complex matters where required.

IT Systems Support & Web Developer - Gubis85 Solutions

December 2025 - May 2026

- Delivered first-line support across Microsoft 365, email, workstation and operational systems.
- Administered user accounts, access, mailbox support and IT asset records.
- Supported website updates, deployment, Google Business Profile improvements and internal technical documentation.

ADDITIONAL EXPERIENCE-Dis-Chem Pharmacies

- Stock control, POS operations, cash-ups, audit accuracy and daily reporting in a high volume environment.

PLATFORMS & SYSTEMS

- Microsoft 365 Administration
- Website Maintenance & Deployment
